# Safety

## HEALTH AND SAFETY TRAINING

At MAKROSAFE, we offer companies and individuals training presented by highly qualified facilitators and assessors who have a vast understanding and experience of the health and safety industry. All our training courses are in accordance with the National Qualifications Framework (NQF).

MAKROSAFE is also accredited by Health and Welfare Sector Education and Training Authority (HWSETA) and endorsed by the South African Institute of Occupational Safety and Health (SAIOSH).

Our training courses for health and safety include: firefighting; forklift novice and recertification training; health and safety courses; medical training; overhead crane novice and recertification training; and health and safety certificate training.

## FIRST AID BOX AND CONTENTS

Our MAKROSAFE team will inspect all your first aid boxes and refill the contents if and when required.

## FULL MEDICAL SERVICES

At MAKROSAFE, we understand that the work done in some industries can be more dangerous than others and as such, we will make certain that your employees get a full medical examination to ensure that they are always in good health, thereby minimising potentially hazardous or dangerous situations.

## OCCUPATIONAL HEALTH AND HYGIENE SERVICES

As authorised by the Department of Labour, we will provide and complete various surveys, including: ergonomic, ventilation, illumination, noise and hazardous chemical substance exposure surveys.

## HAZARDOUS CHEMICAL RISK ASSESSMENT

We will carry out inspections to ensure that your workplace is compliant with the Hazardous Chemical Substance Regulation 5 of the OHS Act 85 of 1993.

## LOAD TESTING

As per the Occupational Health and Safety Act, companies are obligated to do annual load tests. To help you save on time and money, our qualified lifting material inspectors will carry out load testing on your behalf on all of your company's lifting equipment, electric hoists, overhead cranes and crawl beams.

## SERVICING OF FIRE EQUIPMENT

Our MAKROSAFE team will check all fire equipment at your company to ensure that they are regularly serviced and maintained to meet the required standards as set out under the SANS codes.

## MIRCA INCIDENT INVESTIGATION

When an incident occurs on the job, it is vital that a thorough investigation is done to determine the root cause of the incident and that procedures are set in place to prevent it from happening again.

**With these simple add-on services, we can help you make a difference at your company.**
