

OHS RISK ASSESSMENT PACKAGE

The Occupational Health & Safety Act stipulates that every employer should provide and maintain a workplace that is safe and without risk to the health and safety of the employees.

Companies are legally obliged to have risk identified, assessed and controlled.

As the workplace is a vibrant place in today's society, situations change virtually every day.

MAKROSAFE is well-versed to perform risk assessments for the entire scope of risks one can find in the workplace, regardless of the industry the client operates in.

REDUCING RISK

MAKROSAFE risk assessors work according to well-defined protocols to examine risk in the workplace and to identify any issues that could cause harm to employees or the organisation at large.

These assessors identify all activities that have to be executed to control each risk.

As risk is categorised as being High, Medium or Low risks, MAKROSAFE risk assessors suggest control measures they consider to be best to maintain workplaces in the lowest risks categories possible.

All MAKROSAFE risk assessors are well-trained and rely on vast experience. They continuously update their knowledge and skills and closely monitor trends and developments in the industry. This puts them in the best position to identify possible risk at an early stage and to advise companies about control measures that should be considered to nullify or minimise risk to acceptable levels.

The control of incidents and success of control measures is monitored and re-evaluated every three months and clients are briefed continuously to ensure they are aware of the risk pertaining to their workplace.

MEETING THE STANDARDS

Subscribing to the MAKROSAFE Risk Assessment package is the best way to ensure that the workplace risks are identified and controlled.

By signing up today, you will be able to make the necessary changes or updates that will allow productivity to continue and employees to excel.
